

Our client is an internationally operating chemical-pharmaceutical company, which specializes at its headquarters in Germany and several subsidiaries in India and Denmark in the synthesis and production of active pharmaceutical ingredients (APIs) under full GMP. The very successful, future – oriented strategy has led to an impressive growth of business over the past few years.

For the site for synthesis production in Hvidovre near Copenhagen we are looking for a

Head of Pharma – Production (m/f)

The incumbent reports to the local Managing Director.

These are the major responsibilities:

Leading and developing the plant's production staff of experienced, knowledgeable employees.
In cooperation with senior management, planning and managing all aspects of production.
Commissioning and implementing new products and processes in an industrial scale.
Planning and supervising the calibration, repair and maintenance of production equipment.
Ensuring the appropriate safety in the production processes (HSE)
Preparing, evaluating and authorizing of all SOPs, validation protocols, batch journals and other GMP documents.
Ensuring the full implementation of all QA requirements.
Preparing and participating in customer- and authority audits.
Constructively communicating and cooperating with all related departments and colleagues.

As our preferred candidate, you offer the following qualifications:

You have a background as chemical engineer, production engineer, pharmacist or a technical training with emphasis on organic chemistry and /or process engineering.
You are familiar with the technical and legal requirements in the production of APIs under full GMP (part II).
You are a team-worker by conviction and ideally already experienced in leading a highly motivated and skilled team of co-workers.
You know and apply the rules of professional project management.
Knowledge of Microsoft Project Plan, Oracle and Navision is an advantage.

Ruling of the Danish language is a prerequisite.

If you find this description attractive and if you would like to work in a progressive environment with a highly motivated team of colleagues, our project manager, Mr. H.Deffner is looking forward to receiving your application by e-mail.
